EDUCATION

Augsburg University

Bachelor of Science in Business Administration (B.S.B.A.) — Major: Management Information Systems

Minneapolis, MN

GPA: 3.6/4.0 — Expected Fall 2027

EXPERIENCE

Data Analytics Intern — Qualitative & Quantitative Insights

May 2026 – Present

Beats by Dre

Remote

- Analyzed consumer survey data in Python (Google Colab) to identify behavioral trends, brand preferences, and purchase motivations across Beats customer segments using pandas and NumPy for data cleaning and aggregation.
- Applied VADER sentiment analysis to open-ended survey responses, classifying feedback by emotional tone and brand attribute to surface actionable consumer insights for cross-functional business strategy discussions.
- Designed an interactive data visualization dashboard to present findings to the Global Consumer Insights team; communicated results clearly to non-technical stakeholders through structured presentations.
- Compiled a final report synthesizing quantitative and qualitative results, directly supporting senior leadership brand strategy and requirements gathering for future consumer research initiatives.

Operations Specialist

Apr 2022 – Mar 2024

MetroCare Inc.

St. Paul, MN

- Managed scheduling and daily operations for a 4-person healthcare team, establishing workflow systems and process documentation that improved consistency and reduced coordination errors.
- Led systems implementation of a digital scheduling platform, transitioning from paper-based timesheets and reducing duplicate data entry while improving processing efficiency by an estimated 25–35%.
- Maintained DHS billing and payroll reconciliation records in Microsoft Excel, ensuring accurate pay periods and audit-ready documentation through database management and data integrity practices.
- Identified and resolved recurring billing discrepancies through systems analysis and client record restructuring, improving invoice accuracy and reducing payment delays.

PROJECTS

Brand Sentiment & Survey Analysis | *Python, VADER Sentiment, pandas, Matplotlib, Google Colab*

- Applied VADER sentiment scoring and data analysis techniques to customer survey responses, categorizing feedback by emotional tone and brand attribute to identify key factors driving repurchase intent.
- Produced structured data visualizations in Matplotlib covering sentiment distributions and attribute rankings, formatted as a leadership-ready business intelligence report.

Operations Reporting Workbook | *Excel, Pivot Tables, VLOOKUP, Conditional Formatting, Microsoft 365*

- Built a multi-tab Excel workbook consolidating scheduling, visit completion, and billing data across pay periods; used VLOOKUP and pivot tables to generate automated weekly accuracy summaries and KPI reports.
- Calculated pre- and post-adoption billing accuracy rates, documenting a measurable reduction in errors that supported a team-wide systems rollout decision through data-driven requirements analysis.

Internship Job Tracker Dashboard | *Python, REST APIs, HTML/CSS/JavaScript, GitHub Actions*

- Developed Python scripts using REST APIs to query job board platforms — Greenhouse, Lever, LinkedIn, and Workday — aggregating MN and Remote internship listings into a structured JSON database.
- Deployed a live business intelligence dashboard to GitHub Pages with automated hourly data refresh via GitHub Actions CI/CD pipeline; integrated a URL liveness checker to maintain data accuracy automatically.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Analytics & BI: Excel, Tableau, Power BI, Google Sheets, Google Colab, Data Visualization, Business Intelligence

Libraries: pandas, NumPy, Matplotlib

Methods: Systems Analysis, Business Analysis, Survey Analysis, Sentiment Analysis, KPI Reporting, Data Cleaning, Requirements Gathering, Process Documentation, Process Improvement, Cross-functional Collaboration

Tools: Git, GitHub, VS Code, REST APIs, Microsoft 365, Microsoft Office Suite, Canva
