MIS and Data Analytics student at Augsburg University with hands-on experience in Python-based data analysis, Excel reporting, and business operations. Seeking internship opportunities in data analytics, business intelligence, and information systems.

EDUCATION

Augsburg University

Minneapolis, MN

Bachelor of Science in Business Administration (B.S.B.A.), Major: Management Information Systems, GPA: 3.6 — Expected May 2027
Minor: Data Analytics

EXPERIENCE

Data Analytics Extern — Qualitative & Quantitative Insights

May 2026 – Present

Beats by Dre

Remote

- Analyzed consumer survey data in Python (Google Colab) to identify behavioral trends, brand preferences, and purchase motivations across Beats customer segments.
- Applied sentiment analysis to open-ended survey responses, classifying feedback by emotional tone and brand attribute to surface actionable consumer insights.
- Designed an interactive data dashboard to present findings visually; delivered a structured presentation to the Global Consumer Insights team at Beats by Dre.
- Compiled a final report synthesizing quantitative and qualitative results for senior leadership, directly supporting brand strategy discussions.

Operations Specialist

Apr 2022 – Mar 2024

MetroCare Inc.

St. Paul, MN

- Managed scheduling and daily operations for a 4-person healthcare team, establishing workflow systems that improved consistency and reduced coordination errors.
- Led the transition from paper-based timesheets to a digital scheduling system, reducing duplicate data entry and improving processing efficiency by an estimated 25–35%.
- Maintained DHS billing and payroll reconciliation records in Excel, ensuring accurate pay periods and audit-ready documentation for all staff.
- Identified and resolved recurring billing discrepancies by restructuring client records, improving invoice accuracy and reducing payment delays.

PROJECTS

Brand Sentiment & Survey Analysis | *Python, VADER Sentiment, pandas, Matplotlib*

- Used Python to apply VADER sentiment scoring to customer survey responses, categorizing feedback by emotional tone and brand attribute to identify the key factors driving repurchase intent.
- Produced a structured visual summary in Matplotlib — covering sentiment distributions and attribute rankings — formatted as a leadership-ready report.

Operations Reporting Workbook | *Excel, Pivot Tables, VLOOKUP, Conditional Formatting*

- Built a multi-tab Excel workbook consolidating scheduling, visit completion, and billing data across pay periods; used VLOOKUP and pivot tables to generate weekly accuracy summaries.
- Calculated pre- and post-adoption billing accuracy rates, documenting a measurable reduction in errors that supported a team-wide system rollout decision.

Internship Job Tracker Dashboard | *Python, REST APIs, HTML/CSS/JavaScript, GitHub Actions*

- Developed Python scripts to query multiple job board APIs — Greenhouse, Lever, LinkedIn, and Workday — for MN and Remote internship listings, consolidating results into a structured JSON file.
- Deployed a live job-tracking dashboard to GitHub Pages with automated hourly refresh via GitHub Actions; includes a URL liveness checker that removes closed postings automatically.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Analytics & BI: Excel, Google Sheets, Tableau (basic), Power BI (basic), Google Colab

Libraries: pandas, NumPy, Matplotlib

Methods: Survey Analysis, Sentiment Analysis, KPI Reporting, Data Cleaning, Process Documentation

Tools: Git, GitHub, VS Code, Canva, REST APIs
