EDUCATION

Augsburg University

Minneapolis, MN

Bachelor of Science in Business Administration (B.S.B.A.), Major: Management Information Systems, GPA: 3.6 — Expected May 2027
Minor: Data Analytics

EXPERIENCE

Data Analytics Extern — Qualitative & Quantitative Insights

May 2026 – Present

Beats by Dre

Remote

- Cleaned and analyzed consumer survey and open-ended response data in Python (Google Colab) to surface key trends in Beats customer behavior, preferences, and purchase motivations.
- Performed sentiment analysis on customer feedback using Python, extracting emotional tone and consumer insights from qualitative reviews and survey responses.
- Built an interactive consumer insights dashboard using Claude Artifacts and visualized findings through a Gamma presentation to communicate data-driven conclusions clearly.
- Synthesized qualitative and quantitative findings into a final presentation delivered to senior leaders at Beats by Dre, including the Global Consumer Insights team.

Operations Specialist

Apr 2022 – Mar 2024

MetroCare Inc.

St. Paul, MN

- Managed day-to-day operations for a 4-person team, implementing standardized scheduling and workflow systems to improve staff consistency and reduce coordination errors.
- Led a full transition from paper timesheets to the RevivingCare digital system, cutting duplicate data entry and improving processing efficiency by an estimated 25–35%.
- Handled DHS billing and payroll reconciliation in Excel, ensuring accurate pay periods and maintaining audit-ready records across all staff.
- Resolved recurring invoicing errors by reorganizing client billing records, reducing processing delays and improving billing cycle reliability.

PROJECTS

Brand Sentiment & Survey Analysis | Python, VADER, pandas, Matplotlib, Google Colab

- Applied VADER sentiment scoring in Python to categorize open-ended customer responses by emotional tone; grouped scores by brand attribute to rank which factors (sound quality, design, price) most influenced repurchase intent.
- Generated a multi-chart summary using Matplotlib — including sentiment distribution and attribute ranking visuals — formatted into a shareable report for leadership review.

Staff Operations Reporting Workbook | Excel, Pivot Tables, VLOOKUP, Conditional Formatting

- Designed a 4-tab Excel workbook linking scheduling records, visit completions, and billing codes across pay periods; used VLOOKUP and pivot tables to produce a weekly accuracy summary view.
- Compared pre- and post-system billing accuracy using a percentage-change calculation that showed a measurable drop in error rate — presented to team leads to support the case for full rollout.

AI Internship Job Dashboard | Python, REST APIs, HTML/CSS/JavaScript, GitHub Actions

- Wrote Python scripts to query Greenhouse, Ashby, Lever, LinkedIn, and Workday APIs for MN and Remote internship listings; merged results into a single JSON file served by a live GitHub Pages dashboard.
- Automated hourly refresh via GitHub Actions with a URL liveness checker that validates each posting and removes closed listings; includes application tracking with localStorage persistence.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Analytics & BI: Excel, Google Sheets, Tableau (basic), Power BI (basic), Google Colab

Libraries: pandas, NumPy, Matplotlib

Methods: Survey Analysis, Sentiment Analysis, KPI Reporting, Data Cleaning, Process Documentation

Tools: Git, GitHub, VS Code, Canva, REST APIs
